EDUCATION

GLA University, Mathura, Uttar Pradesh, India

Expected 2029

Bachelor of Technology (B.Tech.) in Computer Science Engineering — AI & Data Science

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS, HTML5/CSS3, Selenium, Gradio

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Git, GitHub, Docker, Postman, Firebase, Vercel, VS Code

AI & Cloud: OpenAI-compatible APIs, Groq, Ollama, Hugging Face, n8n, Llama 3 integration

PROJECTS

Nexorithm

June 2026 – Present

Next.js, React, TypeScript, Prisma, PostgreSQL, Clerk, Docker | github.com/DeepuCodesss/NEXORITHM | nexorithm.dev

- Built a full-stack competitive coding platform with an in-browser execution engine supporting 8 languages, including C++, Java, Python, and JavaScript
- Designed an XP, coin, and cash-prize reward system with secure UPI withdrawals, daily challenges, and streak mechanics
- Built recruiter-facing public developer profiles ranked through a custom performance-based scoring system (DevRank)
- Implemented anti-cheat safeguards, including replay analytics, paste detection, and tab-switch monitoring

Legit Club

Feb 2026 – Mar 2026

JavaScript, Node.js, Express, MongoDB, Socket.io, Razorpay | legitclub.xyz

- Built a real-time multiplayer platform synchronizing thousands of concurrent events across users with Socket.io
- Implemented secure authentication, wallet management, and Razorpay payment integration with full transaction tracking
- Built an admin dashboard for user management, balance oversight, referrals, and promotional campaigns

AURIX — Live Attack Detection Dashboard

Mar 2026 – Apr 2026

React, Three.js, Python, FastAPI, WebSockets, Scikit-learn, YARA | github.com/DeepuCodesss/AURIX | aurix-sepia.vercel.app

- Built an AI-powered cybersecurity dashboard for real-time endpoint monitoring and threat detection
- Built lightweight endpoint agents streaming CPU, memory, process, and network activity via WebSockets
- Combined Isolation Forest machine learning with heuristic rules to classify suspicious behavior
- Added VirusTotal and YARA-based malware scanning with quarantine workflows and phishing detection

Personal Portfolio Website

July 2026 – Present

Next.js, React, TypeScript, GSAP, Framer Motion | github.com/DeepuCodesss/My-project | deepucodes.me

- Designed and built an interactive portfolio site inspired by modern product-launch pages
- Built a 146-frame canvas scroll animation with GSAP-powered storytelling
- Implemented desktop-OS-style navigation with draggable windows and animated project showcases

ACHIEVEMENTS & LEADERSHIP

- 2nd place, LeetCode Weekly Contest
- 8th and 9th place finishes across two hackathons
- 2nd place in two chess tournaments; active member, GLA University Chess Club
